

## TORONTO PASSPORT

Name:

# Stay Aware

The number one skill we want you to take away from City Scouts is "**situational awareness**". This is important to keep safe and fully appreciate the city environment.

People who are more aware will stay safer: sense if a car is coming, a stranger is staring at them or if a friend has headed in the wrong direction.

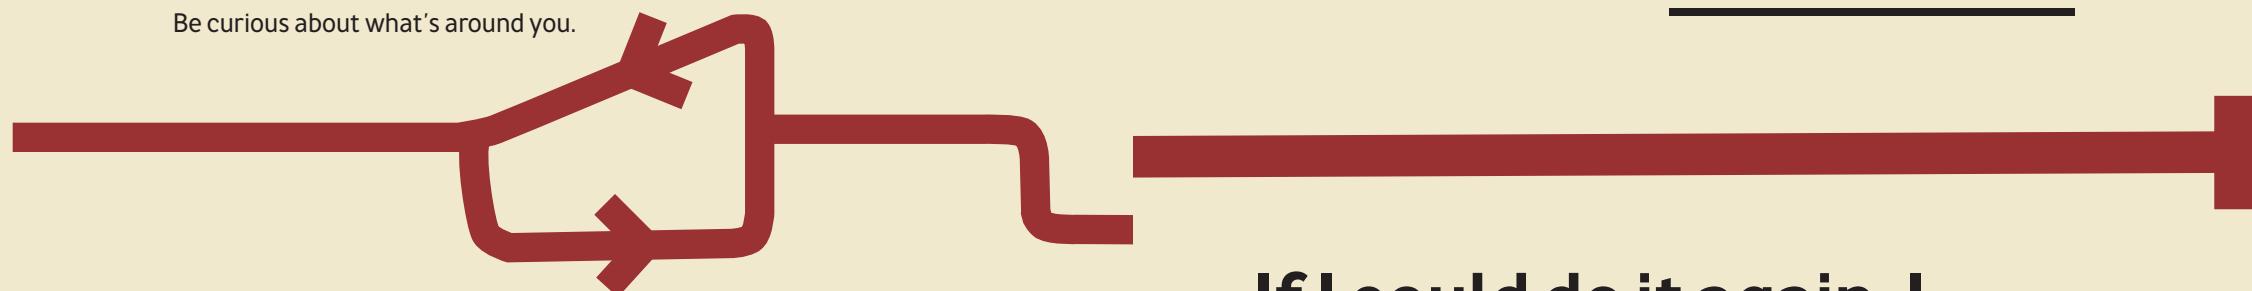

Being attuned to your surroundings not only ensures safety but unlocks the richness of the city environment: interesting shops, intriguing art, people, parks, architecture or a friend passing by.

How to stay aware?

**Keep your head up;**

**Keep your ears open;**

Be curious about what's around you.

**THIS IS HOW  
CITY SCOUTS ROLL**

I really want to visit

again on my own time.

The tastiest thing I tried  
all week was \_\_\_\_\_.

If I could do it again, I  
really wish that  
\_\_\_\_\_.

# Memories

**My favourite day was  
when we visited**

**I really didn't expect  
to happen this week.**

# Guidelines

Follow these guidelines to foster a safe, inclusive and enjoyable camp experience for everyone.

**STICK WITH YOUR BUDDY**

Explore together. If you're alone, you need to find your crew or call your counselor.

**BE KIND**

Treat others the way you want to be treated, be considerate with others.

**BE RESPECTFUL**

Avoid using offensive or disrespectful language.

**LISTEN TO COUNSELORS**

Follow the guidance of your counselors promptly and without complaint.

**BE POSITIVE**

Approach situations and challenges with resilience and determined spirit - no whining!

**DON'T YELL**

Speak so your voices can be heard - but no louder.

**PAY ATTENTION TO PERSONAL BOUNDARIES**

Respect the personal space of others, ensuring everyone feels comfortable - especially in the sometimes cramped environment of streetcars, subways and buses.

**BE INCLUSIVE**

Treat everyone with equality, embracing differences and foster a welcoming environment that excludes no one.

# TTC Safety Features

## SAFE PLACES ON THE TRACKS

Seek shelter under the platform lip or step on the reinforced plank over the third rail.

## EMERGENCY ALARM

The yellow strip above all the subway windows alerts the conductor of an emergency.

## YELLOW PLATFORM EDGE

This lets you know there's a safe distance to wait away from the tracks and provides a tactile surface for the visually impaired.

## KEEP YOUR DISTANCE

If someone makes you feel unsafe, stay calm and move to a distance where you feel comfortable: further down the platform, up the stairs, to another train car or even out of the station if necessary.

## EMERGENCY POWER OFF BUTTON

The blue light at the end of the platform kills the power to the third rail.

## DWA

The Designated Waiting Area has an intercom that goes straight to a TTC official and has a camera pointed right at you.

## TTC Etiquette

Wait until people have exited the train car before you get on. Keep backpacks between your legs during busy rides so you take up less space.

Offer up your seat to pregnant or elderly riders, those traveling with young kids, as well as people with visible or non-visible disabilities. The fold up chairs are fine to use, just keep an eye out for anyone who might need it.

Keep your feet off of the seats.

Take garbage with you and don't spill anything.

## TTC Tips

Take note of where your common exits are relative to the train to help save time. If your exit is at the far end of the track at your last stop then walk to the far end of your first stop while you're waiting.

Take note of the people coming off the platform if you're not sure if it's your subway you just heard pull into the station.

Text the stop number that's found at the bottom of streetcar stop signs to 889-992 for an estimate of when the next streetcar will arrive. The subway opens at 6 a.m. and closes at 1:30 a.m. There are night buses that run between those hours.
